Nirav Bhesaniya

Senior React Native Developer

CURRICULUM VITAE
Chikhli, Gujarat, India
niravbhensania1234@gmail.com

EXPERIENCE	CURRENTLY	PLATFORMS	FULL STACK
7 years	Kjuup, Germany	iOS and Android	Node.js, React

01 PROFILE

Senior React Native developer with 7 years of experience building and shipping iOS and Android apps. Primary mobile engineer on Kjuup, a German team-communication platform, and for five years on Educase, a school-management platform released as 120+ white-label apps. Comfortable owning a product end to end: native modules, real-time features, payments, release automation and testing, plus Node.js and React.

02 EXPERIENCE

Kjuup — Germany · Remote — Oct 2022 – Present

React Native Developer · Primary mobile engineer

Team-communication platform: chat, e-mail, tasks, calendar and video calls on iOS, Android and web. App Store ↗ Google Play ↗

- Own the iOS and Android apps end to end as the primary mobile engineer, from architecture and native modules to feature delivery.
- Run releases for both stores: builds, code signing, TestFlight, App Store and Google Play submissions.
- Step across the stack when a feature needs it: Node.js (Sails) and MySQL APIs, the React web app and the Electron desktop app.
- Keep quality high with Jest unit tests, Detox end-to-end tests on both platforms, and crash tracing in Crashlytics and Bugfender.

Selected work at Kjuup: page 2 ↗

Educase India — Hyderabad, India — Nov 2021 – 2026

React Native Developer · Primary mobile engineer

School-management platform for 350+ schools: one React Native codebase released as 120+ white-label apps.

- Owned the React Native app for admins, staff and parents as the primary mobile engineer, in 9 languages on Google Play and the App Store.
- Ran white-label delivery: schools got their own branded app from one codebase, each with its own icons, Firebase project and signing.
- Automated multi-brand releases with Fastlane (build, signing, version checks, upload, retries) and shipped fixes over the air with CodePush.

Selected work at Educase: page 2 ↗

Artoon Solutions — Surat, India — Nov 2019 – 2021

React Native Developer

Built iOS and Android apps in React Native, from first build to store release.

03 SKILLS

Mobile

React Native · JavaScript · React · Redux · React Navigation · Reanimated · FlashList · New Architecture · Hermes

Native iOS and Android

Xcode · Android Studio · Gradle · CocoaPods · App extensions · Code signing · Fastlane · TestFlight

Real-time and location

Socket.IO · WebRTC · Jitsi Meet · CallKit · VoIP push · FCM · Maps · Geofencing

Backend and payments

Node.js · Sails.js · MySQL · REST APIs · WebSockets · JWT · Stripe · Apple Pay

Web, quality and tools

React · Electron · Jest · Detox · Crashlytics · Bugfender · Git · Jira · CodePush · Claude Code

Also worked with

TypeScript · Swift · Objective-C

04 LANGUAGES

English · Gujarati · Hindi

05 SELECTED WORK AT KJUUP

Messaging
Group and direct chat with replies, forwarding, mentions, media and message info, delivered in real time over Socket.IO.

Voice and video calls
Jitsi and WebRTC calls with native incoming-call screens through CallKit and ConnectionService, VoIP and FCM push.

E-mail client
IMAP accounts, folders, archive, bookmarks, per-folder search, threads, attachments and a composer, inside the app.

Tasks and calendar
ToDos with two-way Todoist sync, appointments synced to the device calendar, and voice task creation through Siri.

Subscriptions
Stripe billing across app, backend and admin panel: free trials, plan changes, saved cards, discounts and Apple Pay.

Security
Two-factor sign-in (TOTP) with single-use backup codes and rate limiting, hardened sessions and expiring deep links.

Integrations
Microsoft Teams calls and chats inside rooms; media export to Google Drive, Dropbox, OneDrive, WebDAV, SFTP and S3.

AI translation
Chat messages and company news translated for each reader by an LLM pipeline that keeps formatting; app UI in 37 languages.

Native extensions and UI kit
iOS share and notification-service extensions, a Control Center control, and the shared UI kit behind the app-wide redesign.

06 SELECTED WORK AT EDUCASE

White-label platform
One codebase released as 120+ branded school apps, each with its own icons, splash screen, Firebase project and signing.

Release automation
Fastlane lanes build, sign, version-check and upload every brand to Google Play and the App Store, with retries and status reports.

Bus tracking
Live school-bus tracking on maps with geofencing: journeys and stops for parents, trip consoles for staff.

School operations
Attendance, homework, school diary, gallery and daycare reports, plus fee payments through the Easebuzz gateway.

Communication
Broadcast module built end to end, instant alerts, and teacher and parent chat in real time over Socket.IO.

Push and deep links
Rewrote push routing and deep linking so a tap opens the right screen across the app, from a cold start or the background.

07 EARLIER PROJECTS

G GoodPix
Social-commerce storefronts for boutique owners and consultants.

I InstaMoola
Tip-distribution accounting for restaurants, for a Canadian startup.

S Suponic
Social app for games, videos and user-created posts.

T TrendyStylist
Fashion store with a personal avatar for previewing clothes.
